Build Your Tomorrow. **Today!**

&

Bring you  
**LEGO-STEAM**  
**Summer Camps!**

For Ages 4-10 years

*Location:*

*Kidsapia Indoor Playground*  
*Erin Mills Town Centre*  
*5100 Erin Mills Parkway*  
*Mississauga, ON L5M 4Z5*

*Phone: 289-997-9177*

For your kids (ages 4-10 years), who love to **experience**, to **experiment**, but especially to enjoy **LEGO construction**, **Young Engineers Greater Mississauga** bring an experiential and challenging learning, with games and scientific experiments that visualize natural phenomena and the forces acting around them.

**Kidsapia**, a unique and innovative Indoor Playground and Family Entertainment Centre, where kids play to learn and grownups learn to play again.

This unique Japanese soft play system provides an engaging, enriching and educational play experience for young children. The **Kidsapia** Play system blends visual appeal with movement to create a unique and stimulating environment.

Each day, the children will participate in a variety of scientific and enriching activities classified in different subjects. Amongst other fun activities, a typical Young Engineers camp day will consist of:

- **Science and Scientists:**

Children will enjoy an educational experience, build a motorized Lego model by their own. This creative activity includes learning of one physical or mechanical principle or concept each day.

- **Brain exercises!**

Children will also experience mental challenges, through the exercise of finding creative solutions to problems, using mathematics and science principles.

- **Team Building and Soft Skills development**

Each day, we will also cover a session on soft skills such as respect, communication, patience etc. We believe that along with education, teaching children essential soft skills at a younger age will help them realize their full potential. After all, they are the leaders of the future!
